

Clinical Policy: Cetuximab (Erbitux)

Reference Number: CP.PHAR.317 Effective Date: 02.01.17 Last Review Date: 11.24 Line of Business: Commercial, HIM, Medicaid

Coding Implications Revision Log

See <u>Important Reminder</u> at the end of this policy for important regulatory and legal information.

Description

Cetuximab (Erbitux[®]) is an epidermal growth factor receptor (EGFR) antagonist.

FDA Approved Indication(s)

Erbitux is indicated for treatment of:

- Head and neck squamous cell carcinoma (HNSCC)
 - Locally or regionally advanced HNSCC in combination with radiation therapy for initial treatment
 - Recurrent locoregional disease or metastatic HNSCC in combination with platinumbased therapy with fluorouracil (5-FU) for first-line treatment
 - Recurrent or metastatic HNSCC progressing after platinum-based therapy, as a single agent
- Colorectal cancer (CRC)
 - K-Ras wild-type, EGFR-expressing, metastatic CRC as determined by an FDA-approved test.
 - In combination with FOLFIRI (irinotecan, fluorouracil, leucovorin) for first-line treatment
 - In combination with irinotecan in patients who are refractory to irinotecan-based chemotherapy
 - As a single agent in patients who have failed oxaliplatin- and irinotecan-based chemotherapy or who are intolerant to irinotecan
 - BRAF V600E mutation-positive metastatic CRC
 - In combination with encorafenib, for the treatment of adult patients with metastatic CRC with a BRAF V600E mutation, as detected by an FDA-approved test, after prior therapy.

Limitation(s) of use: Erbitux is not indicated for treatment of Ras-mutant CRC or when the results of the Ras mutation tests are unknown.

Policy/Criteria

Provider must submit documentation (such as office chart notes, lab results or other clinical information) supporting that member has met all approval criteria.

It is the policy of health plans affiliated with Centene Corporation[®] that Erbitux is **medically necessary** when the following criteria are met:

I. Initial Approval Criteria

- A. Head and Neck Squamous Cell Carcinoma (must meet all):
 - 1. Diagnosis of HNSCC (see Appendix D for subtypes by location);
 - 2. Prescribed by or in consultation with an oncologist;
 - 3. Age \geq 18 years;
 - 4. Disease is advanced, recurrent, unresectable, or metastatic;
 - 5. Prescribed in one of the following ways (a or b):
 - a. As a single agent;
 - b. In combination with platinum-based therapy (e.g., cisplatin or carboplatin), Opdivo[®], Keytruda[®], paclitaxel, or docetaxel (if cisplatin-ineligible);* **Prior authorization may be required for platinum-based therapies.*
 - 6. Request meets one of the following (a, b, or c):*
 - a. Dose does not exceed an initial dose of 400 mg/m² followed by 250 mg/m² weekly thereafter;
 - b. Dose does not exceed 500 mg/m² every 2 weeks;
 - c. Dose is supported by practice guidelines or peer-reviewed literature for the relevant off-label use (*prescriber must submit supporting evidence*).
 - *Prescribed regimen must be FDA-approved or recommended by NCCN

Approval duration: 6 months

- **B.** Colorectal Cancer (must meet all):
 - 1. Diagnosis of advanced, unresectable, or metastatic CRC;
 - 2. Prescribed by or in consultation with an oncologist;
 - 3. Age \geq 18 years;
 - 4. Disease is one of the following (a, b, c, d, or e):
 - a. KRAS/NRAS/BRAF wild-type (i.e., no mutations in KRAS, NRAS, or BRAF genes);
 - b. BRAF V600E mutation positive;
 - c. KRAS G12C mutation positive;
 - d. Deficient mismatch repair/microsatellite instability-high (dMMR/MSI-H);
 - e. Polymerase epsilon/delta (POLE/POLD1) mutation positive;
 - 5. Prescribed in one of the following ways (a, b, c, d, or e):
 - a. As a single agent;
 - b. In combination with FOLFIRI, FOLFOX or CapeOX;
 - c. In combination with irinotecan following prior therapy;
 - d. If BRAF V600E mutation positive: In combination with Braftovi[®] following prior therapy;
 - e. If KRAS G12C mutation positive: In combination with Lumakras[®] or Krazati[®] following prior therapy;
 - 6. For colon cancer that is KRAS/NRAS/BRAF wild-type with unresectable synchronous liver and/or lung metastases: Colon cancer is left-sided only (*see Appendix E*);
 - 7. For dMMR/MSI-H or POLE/POLD1 mutation positive cancer: Member is ineligible for or has progressed on checkpoint inhibitor immunotherapy (*see Appendix B*);
 - 8. Request meets one of the following (a, b, or c):*
 - a. Dose does not exceed an initial dose of 400 mg/m² followed by 250 mg/m² weekly thereafter;

- b. Dose does not exceed $500 \text{ mg/m}^2 \text{ every } 2 \text{ weeks};$
- c. Dose is supported by practice guidelines or peer-reviewed literature for the relevant off-label use (*prescriber must submit supporting evidence*).
 *Prescribed regimen must be FDA-approved or recommended by NCCN

Approval duration: 6 months

C. Non-Small Cell Lung Cancer (off-label) (must meet all):

- 1. Diagnosis of recurrent, advanced, or metastatic non-small cell lung cancer;
- 2. Prescribed by or in consultation with an oncologist;
- 3. Age \geq 18 years;
- 4. Tumor is EGFR exon 19 deletion or exon 21 L858R, EGFR S768I, L861Q, and/or G719X mutation positive;
- 5. Prescribed in combination with Gilotrif as subsequent therapy;* *Prior authorization may be required for Gilotrif
- 6. One of the following (a or b):
 - a. Disease has progressed on or after an EGFR tyrosine kinase inhibitor (TKI) therapy (e.g., Tarceva[®], Gilotrif[®], or Iressa[®]);*

b. Tumor is T790M positive and disease has progressed on or after Tagrisso[®];* **Prior authorization may be required for Tagrisso and EGFR TKI therapies*

7. Dose is within FDA maximum limit for any FDA-approved indication or is supported by practice guidelines or peer-reviewed literature for the relevant off-label use (prescriber must submit supporting evidence).* *Prescribed regimen must be FDA-approved or recommended by NCCN

Approval duration: 6 months

D. Penile Cancer (off-label) (must meet all):

- 1. Diagnosis of metastatic or recurrent penile cancer;
- 2. Prescribed by or in consultation with an oncologist;
- 3. Age \geq 18 years;
- 4. Prescribed as a single agent;
- 5. Prescribed as subsequent-line systemic therapy;
- 6. Dose is within FDA maximum limit for any FDA-approved indication or is supported by practice guidelines or peer-reviewed literature for the relevant off-label use (prescriber must submit supporting evidence).* *Prescribed regimen must be FDA-approved or recommended by NCCN

Approval duration: 6 months

E. Squamous Cell Skin Cancer (off-label) (must meet all):

- 1. Diagnosis of squamous cell skin cancer;
- 2. Prescribed by or in consultation with an oncologist;
- 3. Age \geq 18 years;
- 4. Prescribed in one of the following ways (a or b):
 - a. As a single agent;
 - b. If member is ineligible for or progressed on immune checkpoint inhibitors (*see Appendix B*) and clinical trials: In combination with carboplatin and paclitaxel;
- 5. Disease is advanced, unresectable, high-risk, recurrent, metastatic, inoperable, or not fully resectable;

6. Dose is within FDA maximum limit for any FDA-approved indication or is supported by practice guidelines or peer-reviewed literature for the relevant off-label use (prescriber must submit supporting evidence).* *Prescribed regimen must be FDA-approved or recommended by NCCN

Approval duration: 6 months

F. Other diagnoses/indications (must meet 1 or 2):

- 1. If this drug has recently (within the last 6 months) undergone a label change (e.g., newly approved indication, age expansion, new dosing regimen) that is not yet reflected in this policy, refer to one of the following policies (a or b):
 - For drugs on the formulary (commercial, health insurance marketplace) or PDL (Medicaid), the no coverage criteria policy for the relevant line of business: CP.CPA.190 for commercial, HIM.PA.33 for health insurance marketplace, and CP.PMN.255 for Medicaid; or
 - b. For drugs NOT on the formulary (commercial, health insurance marketplace) or PDL (Medicaid), the non-formulary policy for the relevant line of business: CP.CPA.190 for commercial, HIM.PA.103 for health insurance marketplace, and CP.PMN.16 for Medicaid; or
- 2. If the requested use (e.g., diagnosis, age, dosing regimen) is NOT specifically listed under section III (Diagnoses/Indications for which coverage is NOT authorized) AND criterion 1 above does not apply, refer to the off-label use policy for the relevant line of business: CP.CPA.09 for commercial, HIM.PA.154 for health insurance marketplace, and CP.PMN.53 for Medicaid.

II. Continued Therapy

A. All Indications in Section I (must meet all):

- 1. Currently receiving medication via Centene benefit, or documentation supports that member is currently receiving Erbitux for a covered indication and has received this medication for at least 30 days;
- 2. Member is responding positively to therapy;
- 3. If request is for a dose increase, request meets one of the following (a or b):*
 - a. For HNSCC or CRC: New dose does not exceed 250 mg/m² weekly or 500 mg/m² every 2 weeks;
 - b. New dose is supported by practice guidelines or peer-reviewed literature for the relevant off-label use (*prescriber must submit supporting evidence*).

*Prescribed regimen must be FDA-approved or recommended by NCCN

Approval duration: 12 months

B. Other diagnoses/indications (must meet 1 or 2):

- 1. If this drug has recently (within the last 6 months) undergone a label change (e.g., newly approved indication, age expansion, new dosing regimen) that is not yet reflected in this policy, refer to one of the following policies (a or b):
 - a. For drugs on the formulary (commercial, health insurance marketplace) or PDL (Medicaid), the no coverage criteria policy for the relevant line of business: CP.CPA.190 for commercial, HIM.PA.33 for health insurance marketplace, and CP.PMN.255 for Medicaid; or

- b. For drugs NOT on the formulary (commercial, health insurance marketplace) or PDL (Medicaid), the non-formulary policy for the relevant line of business: CP.CPA.190 for commercial, HIM.PA.103 for health insurance marketplace, and CP.PMN.16 for Medicaid; or
- 2. If the requested use (e.g., diagnosis, age, dosing regimen) is NOT specifically listed under section III (Diagnoses/Indications for which coverage is NOT authorized) AND criterion 1 above does not apply, refer to the off-label use policy for the relevant line of business: CP.CPA.09 for commercial, HIM.PA.154 for health insurance marketplace, and CP.PMN.53 for Medicaid.

III. Diagnoses/Indications for which coverage is NOT authorized:

A. Non-FDA approved indications, which are not addressed in this policy, unless there is sufficient documentation of efficacy and safety according to the off label use policies – CP.CPA.09 for commercial, HIM.PA.154 for health insurance marketplace, and CP.PMN.53 for Medicaid or evidence of coverage documents.

IV. Appendices/General Information

Appendix A: Abbreviation/Acronym Key	
5-FU: fluorouracil	FOLFOXIRI: fluorouracil, leucovorin,
CapeOX: capecitabine, oxaliplatin	oxaliplatin, irinotecan
CRC: colorectal cancer	HER: human epidermal growth factor
dMMR/MSI-H: deficient mismatch	receptor
repair/microsatellite instability-high	HNSCC: head and neck squamous cell
EGFR: epidermal growth factor receptor	carcinoma
FDA: Food and Drug Administration	KRAS: Kirsten rat sarcoma 2 viral oncogene
FOLFIRI: fluorouracil, leucovorin,	homologue
irinotecan	NRAS: neuroblastoma RAS viral oncogene
FOLFOX: fluorouracil, leucovorin,	homologue
oxaliplatin	POLE/POLD1: polymerase epsilon/delta

Appendix B: Therapeutic Alternatives

This table provides a listing of preferred alternative therapy recommended in the approval criteria. The drugs listed here may not be a formulary agent for all relevant lines of business and may require prior authorization

Drug Name	Dosing Regimen	Dose Limit/ Maximum Dose
Modified FOLFOX 6	CRC Day 1: oxaliplatin 85 mg/m ² IV Day 1: Folinic acid 400 mg/m ² IV Days 1–3: 5-FU 400 mg/m ² IV bolus on day 1, then 1,200 mg/m ² /day × 2 days (total 2,400 mg/m ² over 46–48 hours) IV continuous infusion Repeat cycle every 2 weeks.	See dosing regimen
CapeOX	CRC Day 1: Oxaliplatin 130 mg/m ² IV	See dosing regimen

Drug Name	Dosing Regimen	Dose Limit/
Drug Maine	Dosing Regimen	Maximum Dose
	Days 1–14: Capecitabine 1,000	Waxinum Dosc
	mg/m ² PO BID	
	Repeat cycle every 3 weeks.	
FOLFIRI	CRC	See dosing regimen
FOLFIKI	Day 1: Irinotecan 180 mg/m ² IV	See dosing regimen

TIP (paclitaxel,	Penile Cancer	See dosing regimen
ifosfamide,	Paclitaxel 175 mg/m ² IV on day 1;	
cisplatin)	ifosfamide 1,200 mg/m ² IV on day 1-3;	
	cisplatin 25 mg/m ² IV on day 1-3	

Drug Name	Dosing Regimen	Dose Limit/ Maximum Dose
	Repeat every 3 to 4 weeks.	
5-FU, cisplatin, carboplatin	HNSCC cisplatin 100 mg/m2 IV or carboplatin AUC 5 IV on day 1, plus 5-FU 1,000 mg/m ² IV on days 1, 2, 3, and 4, repeated every 3 weeks	See dosing regimen
	Penile Cancer 5-FU 800 - 1,000 mg/m ² /day continuous IV on days 1-4 or 2-5; cisplatin 70-80 mg/m ² IV on day 1 Repeat every 3 to 4 weeks.	
Immune checkpoint inhibitors: Keytruda (pembrolizumab), Libtayo [®] (cemiplimab- rwlcf)	Squamous Cell Skin Cancer Varies	Varies

Therapeutic alternatives are listed as Brand name[®] (generic) when the drug is available by brand name only and generic (Brand name[®]) when the drug is available by both brand and generic.

Appendix C: Contraindications/Boxed Warnings

- Contraindication(s): none reported
- Boxed warning(s): infusions reactions, cardiopulmonary arrest

Appendix D: Head and Neck Squamous Cell Cancers by Location*

- Paranasal sinuses (ethmoid, maxillary)
- Larynx (glottis, supraglottis)
- Pharynx (nasopharynx, oropharynx, hypopharynx)
- Lip and oral cavity
- Major salivary glands (parotid, submandibular, sublingual)
- Occult primary

*Squamous cell carcinoma, or a variant, is the histologic type in more than 90% of head and neck cancers.

Appendix E: KRAS/NRAS/BRAF Wild-Type Colon Cancer with Unresectable, Synchronous Liver and/or Lung Metastases

• The NCCN Colon Cancer Guidelines recommend that cetuximab should only be used for left-sided tumors in in KRAS/NRAS/BRAF wild-type colon cancer with unresectable, synchronous liver and/or lung metastases. The panel defines the left side of the colon as splenic flexure to rectum. Evidence suggests that patients with tumors originating on the

right side of the colon (hepatic flexure through cecum) are unlikely to respond to cetuximab. Data on the response to cetuximab in patients with primary tumors originating in the transverse colon (hepatic flexure to splenic flexure) are lacking.

V. Dosage and Administration

Indication	Dosing Regimen	Maximum Dose
HNSCC, CRC	Weekly schedule: initial dose 400 mg/m ² IV followed by 250 mg/m ² IV weekly	See dosing regimen
	Biweekly schedule: initial and subsequent doses 500 mg/m ² IV every 2 weeks	

VI. Product Availability

Single-dose vials: 100 mg/50 mL, 200 mg/100 mL

Coding Implications

Codes referenced in this clinical policy are for informational purposes only. Inclusion or exclusion of any codes does not guarantee coverage. Providers should reference the most up-todate sources of professional coding guidance prior to the submission of claims for reimbursement of covered services.

disease; for squamous cell skin cancer, added qualifiers of unresectable and recurrent disease, removed qualifier of very high		
risk, and added pathway for combination use with carboplatin and paclitaxel; references reviewed and updated.		

Important Reminder

This clinical policy has been developed by appropriately experienced and licensed health care professionals based on a review and consideration of currently available generally accepted standards of medical practice; peer-reviewed medical literature; government agency/program approval status; evidence-based guidelines and positions of leading national health professional organizations; views of physicians practicing in relevant clinical areas affected by this clinical policy; and other available clinical information. The Health Plan makes no representations and accepts no liability with respect to the content of any external information used or relied upon in developing this clinical policy. This clinical policy is consistent with standards of medical practice current at the time that this clinical policy was approved. "Health Plan" means a health plan that has adopted this clinical policy and that is operated or administered, in whole or in part, by Centene Management Company, LLC, or any of such health plan's affiliates, as applicable.

The purpose of this clinical policy is to provide a guide to medical necessity, which is a component of the guidelines used to assist in making coverage decisions and administering benefits. It does not constitute a contract or guarantee regarding payment or results. Coverage decisions and the administration of benefits are subject to all terms, conditions, exclusions, and limitations of the coverage documents (e.g., evidence of coverage, certificate of coverage, policy, contract of insurance, etc.), as well as to state and federal requirements and applicable Health Plan-level administrative policies and procedures.

This clinical policy is effective as of the date determined by the Health Plan. The date of posting may not be the effective date of this clinical policy. This clinical policy may be subject to applicable legal and regulatory requirements relating to provider notification. If there is a discrepancy between the effective date of this clinical policy and any applicable legal or regulatory requirement, the requirements of law and regulation shall govern. The Health Plan retains the right to change, amend or withdraw this clinical policy, and additional clinical policies may be developed and adopted as needed, at any time.

This clinical policy does not constitute medical advice, medical treatment, or medical care. It is not intended to dictate to providers how to practice medicine. Providers are expected to exercise professional medical judgment in providing the most appropriate care, and are solely responsible for the medical advice and treatment of members. This clinical policy is not intended to recommend treatment for members. Members should consult with their treating physician in connection with diagnosis and treatment decisions.

Providers referred to in this clinical policy are independent contractors who exercise independent judgment and over whom the Health Plan has no control or right of control. Providers are not agents or employees of the Health Plan.

This clinical policy is the property of the Health Plan. Unauthorized copying, use, and distribution of this clinical policy or any information contained herein are strictly prohibited. Providers, members, and their representatives are bound to the terms and conditions expressed herein through the terms of their contracts. Where no such contract exists, providers, members and their representatives agree to be bound by such terms and conditions by providing services to members and/or submitting claims for payment for such services.

Note:

For Medicaid members, when state Medicaid coverage provisions conflict with the coverage provisions in this clinical policy, state Medicaid coverage provisions take precedence. Please refer to the state Medicaid manual for any coverage provisions pertaining to this clinical policy.
